

BEST BY TEST

AS HIGH AS 58 INCHES

Look at That KNOT

The Page "LION" knot is bent and crimped just enough so that it gets a firm grip on the stay and line wires and prevents slipping, yet does not break the heavy galvanizing. The Page "LION" knot has no sharp bends. It prevents slipping, not being wound tightly around the wires the way most knots are made, indenting, partially cutting and thereby weakening the wires, but by being coiled in such a way that any pull on the stay and line wires only tightens the knot's grip more securely—its a "LION'S" grip. The marginal and line wires are made of high carbon coil spring steel, the coil construction making them springy and elastic, and giving Page "LION" fencing a resiliency unknown to other fences. Page "LION" is made for all fencing purposes—corral, hog, stock and poultry. We want you to investigate the quality, style and price of this famous fencing.
